I want to add a button in my LyX document. I tried adding a button which is marked as `\NewButton{my button}{name of button}{name of button label}{location of button}` and it returns error saying Syntax error in input file. How do I add a button? A: The button is a little undocumented feature and is (IMHO) not very user friendly. It has a couple of problems. If you have the button in the page you cannot change the name of it. You cannot add sub-buttons to the button. To use the button, you first have to activate the layout. This is not obvious, and because the 04aeff104c
