Review by Vicky Lilo on 04/03/2017 I'm a company owner that's been using this software for over a year. There are several "for dummies" versions on the market, but they tend to skip the part that actually makes the software work. Not so with ViewCompanion Pro. I have used a number of other layout programs, and while they all do things a certain way, ViewCompanion Pro does them the right way and makes them easy to learn. I just wish they would do a better job of making it easier to find features. For example, the features are in the top bar menu, but there is no indicator in the main window showing what they do.
